

EWI4000S

THE FUTURE OF WIND INSTRUMENTS

A GIANT LEAP FORWARD IN THE EVOLUTION OF WIND INSTRUMENTS. The EWI4000S is the latest innovation in electronic wind instruments from Akai. It is a full-featured electronic wind instrument and MIDI controller with a built-in sound module. The EWI4000S allows wind players to expand their sonic options with 100 built-in sounds.

The EWI4000S is an easy-to-use, versatile wind instrument and controller that enables the musician to express their inner voice. The EWI4000S is the wind player's gateway into electronic music.

The EWI4000S expands the boundaries of musical innovation by delivering a full-bodied sonic experience, portability, and creative expression.

FEATURES

- Electronic Valve Instrument (EVI) fingering mode for brass players
- Touch sensitive keys and octave roller for quick and responsive playing
- Sensitive breath sensor for expressive dynamics
- Built-in analog modeling synth sound module
- Built-in MIDI output for use with sound modules
- PC and Mac Editor software for customizing, storing and instantly recalling internal sounds
- Lightweight and portable design with battery

"The EWI is off the charts! There are so many things I can do with this instrument, it's like having several wind players with the power of a mighty synth, right in my hands."

MIKE PHILLIPS
Jazz Saxophonist
[Prince, Stevie Wonder]
