

T1 EVO

Dear Music Lover,

Congratulations and thank you for choosing the Pro-Ject Audio Systems record player.

Your T1 EVO turntable has been handcrafted and rigorously tested by skilled technicians to give you years of enjoyable, trouble-free service.

Please contact your dealer if you require additional assistance.

Important:

Your turntable was shipped partially disassembled in order to avoid damage to sensitive parts. Please check immediately to make sure that neither the packaging nor the device was damaged in transit. If you are missing parts or if the unit is damaged, please do not operate and contact your dealer.

Disposal of packaging material:

Pro-Ject packaging is carefully designed to protect your component from damage in transit and you are strongly urged to keep the original packaging in order to safely ship or otherwise transport your turntable in the future.

However, the packaging materials were chosen to be environmentally friendly, so if you must discard the packaging, please recycle.

GENERAL INFORMATION

Controls, features and connections

- 1 PLATTER & FELT MAT
- 2 CHASSIS
- 3 SPEED CONTROL BUTTON
- 4 MOTOR WITH PULLEY
- 5 DRIVE BELT
- 6 SUB-PLATTER
- 7 TONEARM COUNTERWEIGHT
- 8 TONEARM LIFT LEVER
- 9 TONEARM REST POSITION
- 10 TONEARM TUBE
- 11 HEADSHELL WITH ORTOFON OM 10 CARTRIDGE
- 12 LID
- 13 LID HINGES
- 14 HINGE FASTENERS
- 15 POWER SUPPLY SOCKET

Accessories

- a SINGLE ADAPTOR
- b ALLEN KEY 2mm
- c COUNTERWEIGHT no. 56
- d TWO-POINT CARTRIDGE ALIGNMENT PROTRACTOR
- e CONNECTION CABLE (CONNECT IT PHONO E RCA)
- f SETUP GUIDE
- g UNIVERSAL POWER SUPPLY

SETUP

1. Platter and drive belt installation

Please remove the drive belt from the accessory box and install it as shown in the following illustration. Put the felt mat on the top of the platter.

2. Switching on and off, changing replay speed

The turntable is equipped with a three-position switch for ON/OFF and electronic speed change. To play records at 33 rpm, press the switch (3) to the "I" position. To play records at 45 rpm, press this switch (3) to the "II".

3. Cartridge installation, stylus exchange

* If you purchased this turntable in a package that included the cartridge, this has already been done for you.

Install the cartridge into the aluminium headshell, using the appropriate hardware included with your cartridge. All cartridges with half inch mounting holes can be fitted.

Connect the cartridge as indicated below:

- White left channel L+
- Red right channel R+
- Green right channel R-
- Blue left channel L-

For correct cartridge alignment, use the two-point cartridge alignment protractor provided with your T1 EVO accessories. If unfamiliar with two-point setup, please refer to your dealer.

A damaged or worn stylus may harm your record collection and should be replaced.

Please remove stylus protection before pulling the stylus from the cartridge and replace it with a new one.

Stylus type is exchange for pre-mounted cartridge Ortofon OM 10: Stylus OM 10. If in doubt, consult your local dealer or distributor.

4. Vertical Tracking Force setting (VTF)

* This setting is only necessary when you decide to replace your cartridge. For factory fitted cartridge, VTF was perfectly pre-set already.

Before setting up the Vertical Tracking Force, confirm the exact weight of your cartridge.

Pushing carefully, move the counterweight onto the rear end of the counterweight support rod as shown in the illustration below. Place the stylus pressure gauge onto the platter. To set the required VTF, lower the tonearm lift lever as indicated in the illustration and place the tip of the stylus exactly in between the two points marked 15mN and 20mN.

If the stylus gauge becomes level, then the correct pressure has been achieved. However, if there is insufficient or excessive pressure the gauge will either not move or tilt down.

To adjust the amount of pressure, carefully move the counterweight (7) along the support rod, until the stylus pressure is sufficient to raise the pressure gauge to the level position. Moving the counterweight (7) away from the cartridge will reduce pressure and towards will increase pressure. Finally secure the counterweight (7) using hexagonal key provided.

5. Maintenance and cleaning

Your record player requires little or no regular maintenance. Remove dust with a slightly moistened antistatic cloth. Never use a dry cloth because this will create static electricity which attract more dust! Antistatic cleaning fluids are available at specialist stores but must be applied sparingly to avoid damage to rubber parts. It is recommended to fit the needle cover before cleaning or maintenance is carried out to avoid damage. If the player is not used over a long period of time the drive belt can be removed to prevent unequal stretching.

T1 EVO

SPECIFIC INFORMATION

Connection to the amplifier

The record player has a captive tonearm signal lead for connection to the amplifier. Use the Phono input on your amplifier. Make sure that the phono input offers correct matching and amplification for the type of cartridge used. Line inputs (such as CD, Tuner, Tape or Video) are not suitable.

Take care to connect the left and right channels correctly. The right channel is usually marked red, the left channel black or white. Check the manual supplied with your amplifier for relevant information. The earthing wire of the tonearm lead should be connected to the earth terminal on your amplifier (if provided).

If your amplifier does not have an input suitable for phono cartridges you will require a separate phono amplifier stage for MM or MC cartridges which is then connected between the record player and a free line level input of the amplifier.

Connection to the amplifier

The record player has gold plated female RCA phono sockets and possibility to choose between Phono and LINE output. With LINE OUT on, you can use a line input (such as AUX, CD, Tuner, Tape or Video) on your amplifier. With PHONO OUT on, you can use your own phono pre-amplifier (sometimes labelled gram, disc or RIAA).

Take care to connect the left and right channels correctly. The right channel is usually marked red, the left channel black or white. The earthing wire of the tonearm lead should be connected to the earth terminal on your amplifier (if provided).

Connection to the amplifier

The record player has two possible outputs – Line OUT with integrated preamplifier and Phono OUT for connection to the preamplifier. If you choose Phono OUT, then use the Phono input (sometimes labelled gram, disc or RIAA) on your amplifier. Make sure that the phono input offers correct matching and amplification for the type of cartridge used. If you choose Line OUT, then use the Line inputs (like CD, Tuner, Tape or Video).

Take care about connecting the left and right channel correctly. The right channel is usually marked red, the left channel black or white. Check the manual of your amplifier for relevant information. An earthing wire may be connected to the screw terminal between the sockets if you encounter humming problems.

BT pairing

The record player has BT output and transmit signal automatically when is connected to mains.

It is paired automatically with any device with BT receiver (such as Pro-Ject MaiA, MaiA DS, BT Box s and BT Box E).

For pairing with other devices and portable speakers use the manual of the given product.

For restart of the BT transmitter, please turn OFF and ON the BT module by using the switch. Restart is needed only when there is a change of the BT receiver.

Technical specifications Pro-Ject T1 EVO / Pro-Ject 8.6

Nominal speeds	33/45 r.p.m.
Speed variance	33: $\pm 0.70\%$ 45: $\pm 0.60\%$
Wow and flutter	33: $\pm 0.25\%$ 45: $\pm 0.23\%$
Signal to noise	-65dB
Effective tonearm mass	8.0g
Effective tonearm length	8.6" (218.5mm)
Overhang	22mm
Power consumption	4.5W
Power input	15V/ 0.8 A DC, universal power supply
Dimensions (W x H x D)	420 x 112 x 330mm
Weight	5.0kg
Dimensions packaging (W x H x D)	488 x 235 x 393mm
Weight incl. packaging	7.0kg

Technical specifications MM-Cartridge Ortofon OM 10

Frequency range	20-22.000Hz
Channel separation	22dB/1 kHz
Output voltage	4mV
Recommended load impedance	47kohms/amplifier connection – MM-input
Compliance/stylus type	25 μ m/mN – elliptical
Recommended tracking force	15mN
Weight	5g

Technical specifications MM phono pre-amplifier

Gain	34dB
Output voltage typically	200mV/1kHz at 5mV/1kHz input
Input impedance	47kohms/100pF
Noise floor	-68dB
RIAA-equalisation curve accuracy	20Hz-20kHz / max. 0,5dB

BT

Maximum transmit power per operated frequency band	Class II, 2.5mW (4dBm) per 2.4GHz – 2.48 GHz

FCC ID

Federal Communication Commission (FCC) Interference Statement FCC Part 15: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

To maintain compliance with FCC's RF exposure guidelines, this equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Contains FCC ID: 2ARV2-EP3056T

Potential incorrect use and fault conditions

Pro-Ject turntables are manufactured to the highest standards and undergo strict quality controls before leaving the factory. Faults that may possibly occur are not necessarily due to material or production faults but can sometimes be caused by incorrect use or unfortunate circumstances. Therefore, the following list of common fault symptoms is included.

The platter doesn't turn although the unit is switched on:

- The unit is not connected to the mains power supply.
- No mains at the socket.
- Drive belt is not fitted or has slipped off.

No signal through one or other channel or both channels:

- No signal contact from the cartridge to the internal tonearm wiring or from that to the arm lead or from that to the phono box or between that and the amplifier. This could be due to a faulty plug, broken wire or solder joint or simply loose plug/socket connection.
- Phono input not selected at amplifier.
- Amplifier is not switched on.
- Amplifier or speakers are defective or muted.
- No connection to the loudspeakers.

Strong hum on phono input:

- No earth connection from cartridge or arm or arm cable to amplifier, or earth loop.

Distorted or inconsistent sound from one or both channels:

- Record player is connected to wrong input of amplifier, or MM/MC switch incorrectly set.
- Needle or cantilever damaged.
- Wrong r.p.m., drive belt overstretched or dirty, platter bearing without oil, dirty or damaged

Service

Should you encounter a problem which you are not able to alleviate or identify despite the above information, please contact your dealer for further advice. Only when the problem cannot be resolved there should the unit be sent to the responsible distributor in your country.

Guarantee repairs will only be affected if the unit is returned correctly packaged. For this reason, we recommend keeping the original packaging.

Never return a record player without making sure that it is safely disassembled and correctly packaged in the original packaging according to the diagrams on the last page of this user guide. Please remove these parts and pack them separately: lid, counterweight, anti-skating weight and belt.

Fit the cartridge protection cap and the transport lock for the tonearm tube, prior to carefully packaging the record player.

Warranty

The manufacturer accepts no responsibility for damage caused by not adhering to these instructions for use and/or by transportation without the original packaging. Modification or change to any part of the product by unauthorized persons, release the manufacturer from any liability over and above the lawful rights of the customer.
